The Pavilion at Williamsburg Place opened in April of 2012 on the established campus of Williamsburg Place near Historic Colonial Williamsburg, Virginia. The 57-bed, 33,500 square foot, inpatient psychiatric facility offers services based on principles of milieu therapy which provide a safe, supportive and secure environment for individuals to return to a stable level of functioning and live life to the fullest. Each individual is assessed by a team of professionals led by a psychiatrist to determine that they meet the medically necessary criteria for inpatient level of care. Treatment service include:

- Older Adult Program - The older adult program is designed specifically for adults ages 55 and over. Presenting symptoms may include behavioral disturbances, severe depression with suicidal thoughts, anxiety, hallucinations and delusions.
- Acute Adult Program - The Acute program offers an intense level of care to individuals who are an immediate danger to themselves or others or experiencing severe dysfunction due to a psychiatric condition.
- Medical Detoxification - The medical staff is trained in managing complicated withdrawal, as well as medical and psychiatric concerns.
- Military Personnel and Dependents - This program is designed to treat psychiatric conditions facing active duty service members who may be suffering from psychiatric problems. Services are also available to dependents who struggle to cope with issues facing family members who are currently serving or returning veterans.
