The National Troops to Truckers program mission is to provide a value-added connection between military personnel, present and past, and the schools, employers, and other civilian organizations that seek to bring veterans into or back into the commercial truck driving profession. The National Troops to Truckers program is further committed to serving each veteran equally, without limitation based on physical or mental disability, character of discharge, duration of post-service activity, ethnicity, national origin, gender, sexual orientation, familial, or financial status. Further, the program seeks to assist the spouses and partners of veterans in seeking education and employment that compliments or supports the career and economic prosperity of the military or military veteran family.
