The Emergency Shelter is the only emergency shelter in Fauquier County, it is a 52 bed facility. The building is 100% accessible to persons with physical disabilities, has

a reading room, and has a children's play room.

A trained staff oversees shelter operations 24/7 and the on-site case manager helps to formulate and facilitate a clients' plans for stable housing after their shelter tenure.

In-house comprehensive support programs include budget management, various employment-related programs, life-skills classes, nutritional classes, job search services, parenting classes and children programs. These programs are augmented by other community programs through collaborations established by FFSS with its partners. Referral services to local, state and federal resources are provided to all residents as appropriate.
