United States

The Troops to Truckers program's mission is to provide a value-added connection between military personnel, present and past, and the schools, employers, and other civilian organizations that seek to bring veterans into or back into the commercial truck driving profession. Troops to Truckers is committed to serving each veteran equally, without limitation based on physical or mental disability, character of discharge, duration of post-service activity, ethnicity, national origin, gender, sexual orientation, and familial, or financial status. The program seeks to assist the spouses and partners of veterans in seeking education and employment that complements or supports the career and economic prosperity of the military or military veteran

family.
