Women Veterans Health Care

About VA Health Care for Women Veterans

At each VA Medical Center nationwide, a Women Veterans Program Manager is designated to advise and advocate for women Veterans. She can help coordinate all the services you may need, from primary care to specialized care for chronic conditions or reproductive health.

Woman Veterans who are interested in receiving care at VA should contact the nearest [VA Medical Center](#) and ask for the Women Veterans Program Manager.

VA health care for women Veterans includes:

Primary Care

- General care includes health evaluation and counseling, disease prevention, nutrition counseling, weight control, smoking cessation, and substance abuse counseling and treatment as well as gender-specific primary care, e.g., cervical cancer screens (Pap smears), breast cancer screens (mammograms), birth control, preconception counseling, Human Papillomavirus (HPV) vaccine, menopausal support (hormone replacement therapy).
- Mental health includes evaluation and assistance for issues such as depression, mood, and anxiety disorders; intimate partner and domestic violence; sexual trauma; elder abuse or neglect; parenting and anger management; marital, caregiver, or family-related stress; and post-deployment adjustment or post-traumatic stress disorder (PTSD).
- Military Sexual Trauma (MST). Women—and men as well—may experience repeated sexual harassment or sexual assault during their military service. Special services are available to women who have experienced MST. VA provides free, confidential counseling and treatment for mental and physical health conditions related to MST. [More on MST](#).

Specialty Care

- Management and screening of chronic conditions includes heart disease, diabetes, cancer, glandular disorders, osteoporosis, and fibromyalgia as well as sexually transmitted diseases such as HIV/AIDS and hepatitis.
- Reproductive health care includes maternity care, infertility evaluation and limited treatment; sexual problems, tubal ligation, urinary incontinence, and others. VA is prohibited by legislative authority from providing either in-vitro fertilization or abortion services.
- Rehabilitation, homebound, and long-term care. VA referrals are given to those in need of rehabilitation therapies such as physical therapy, occupational therapy, speech-language therapy, exercise therapy, recreational therapy, and vocational therapy. Homebound and long-term care services are available as well, limited to those meeting specific requirements.

Telephone Care

For enrolled women Veterans, a VA health care professional is available by phone at each VA Medical Center to answer questions and advise on health concerns 24 hours a day, 7 days a week. If you are currently enrolled as a VA patient, you can [contact your VA Medical Center](#) and ask for the telephone care number.

Programs for Special Groups

Special programs provide services for [homeless women Veterans](#), victims of domestic violence, and women Veterans interested in education and training, employment assistance, and vocational rehabilitation. For more information, follow [this link](#).
